OBJECTIVES

A passionate and hardworking IT student looking for an opportunity to start my career in the technology field, where I can utilize my programming and analytical skills to solve real-world problems and continuously learn new technologies.

INTERNSHIP

Data Preprocessing and Business Analytics in anudip foundation , salem

Python Full stack web development in united soft tech , salem

Cloud computing in viswa technology, salem

SKILLS

Python programming

SQL

Django - frame work

Flask – frame work

Excel

Power BI

Html & Css

EDUCATION

B.Sc [computer science] [73%] - Government Arts and Science College , Idappadi

2021 - 2024

M.Sc [computer science][79%] - Periyar University , Salem

2024 - 2026

PROJECTS

ONLINE LEGAL CONSULTATION PLATFORM

Online Legal Consultation Platform is a full-stack web application developed to bridge the gap between clients seeking legal assistance and verified advocates. The platform provides an intuitive interface for clients to search, filter, and book appointments with advocates based on specialization, location, and consultation fees.

HOSPITAL BED ALLOCATION SYSTEM

A comprehensive web-based application designed to streamline hospital bed allocation, patient admission, discharge management, and real-time occupancy tracking. The system automates the entire bed management workflow, reducing manual errors and improving operational efficiency in healthcare facilities.

PHISHING URL DETECTION USING ML AND FLASK

Created a Random Forest model achieving 95.4% accuracy in detecting phishing URLs using 80+ features, and developed a Flask web app for real-time URL checking with color-coded results and trusted domain whitelist.

INSTAGRAM USER DASHBOARD

Developed an Instagram Usage Analytics dashboard using Power BI to analyze user behavior, engagement levels, and screen time patterns. The project involved creating DAX measures, data models, and interactive visualizations to study relationships between followers, engagement, ad performance, and lifestyle factors such as sleep and stress, helping derive meaningful insights from the data.
